

THE AVA - DAVID MARR MEDAL

ANNOUNCEMENT OF 2016 AWARD

Every two years, the AVA invites nominations for the David Marr medal, which recognizes the achievements of an outstanding vision scientist in the early part of his or her research career. The award is named in memory of one of the United Kingdom's most distinguished vision researchers.

The AVA is pleased to announce that:

- for his pioneering studies of early mechanisms in human spatial and binocular vision using a broad range of approaches, including experimental psychophysics, computational modeling, electrophysiology and imaging, the AVA has decided to award the Marr medal for 2016 to **Dr Daniel Baker**, a Lecturer in the Department of Psychology, University of York.

Dr Daniel Baker

Dr Baker has been invited to receive the award and to give a keynote lecture on:

"Encoding and decoding in binocular vision"

at the upcoming joint [AVA/Scottish Vision Group conference](#), 8-10 April 2016.

Our warm congratulations go to Daniel as the 2016 winner of the AVA Marr medal.
